What can we do for you?

4

WE UNDERSTAND YOUR GOALS!

DevOps

Rapid implementation of high-quality software. A more effective and efficient level of cooperation between departments is striven for. This allows added value to be created more quickly.

Cloud transformation

We consider all the aspects and – together with you – decide on the right strategy. The result is a scalable and sustainable cloud solution.

CI/CD Pipelines

By identifying weak points in your development environment, we support you in accelerating and optimizing your software projects.

IT-Infrastruktur

IT infrastructure is the foundation of every company. You can also save enormous costs through a perfect utilization process.

Log-Management & Analyse

With Graylog or ELK-stack-as-a-service, we offer you a robust platform for log management and analysis.

Managed Services

We take responsibility for and ensure the smooth operation of your IT. We offer DevOps services, DataOps services, CloudOps services, or SecOps services. Our managed services are precisely tailored to the needs of complex IT environments.

Reasons for Managed Services

WHY SHOULD YOU TRUST US?

Calculable costs

You pay for what we have jointly agreed on in the scope of services. This leads to transparency—the basis for a trusting partnership.

Proven in practice

We have more than 10 years of broad industry project experience, ranging from medium-sized businesses through to large corporations and other heavyweights.

Flexibility

The service is provided according to your needs. Either in our omniIT office or at your site.

Tailor-made

According to your wishes, we offer clearly defined services with Service Level Agreements.

Security

Organizational and technical measures as well as the use of state-of-the-art technology ensure maximum protection.

All-round carefree package

We combine our know-how from all areas under one roof. This gives you access to our experts at any time.
